

DOGSTATION M5

Your dog loves running around in the park with you, and keeping pace as you walk the streets around where you live – and neither of you want the worry of stepping in something nasty. What makes a clean living environment so attractive is that there are fewer reasons to worry. Dog-Station is a solution combining a waste bin and a plastic bag dispenser. Having DogStations dotted around your town or city isn't just useful: its a sign of cleanliness and care.

FEATURES

Dogstation is a complete set which includes a plastic bag tray and a waste bin.

An ideal solution for pet owners to clean up after their pets.

The included spacious plastic bag tray holds up to 1,200 plastic bags.

Plastic bags are stored in cassettes which makes it extremely easy to fill the tray.

The spring lock locks automatically when the door is closed.

Extery quality without compromise- harmonious design, carefully selected materials and engineering considered to the last detail.

METAL

Hot-dip galvanized and powder coated sheet metal corpus and metal frame. The frame galvanization meets the ISO 1461:2009 standard.

RAL recommendation by designer:

RAL 7016
+ graffiti
protection

RAL 7039

RAL 6005

RAL 9007

INSTALLATION

Anchored to the pavement.

Anchored to the substructure laid into the ground.

EXTRAS

Anti-graffiti coating - we offer the possibility to cover the waste bin with anti-graffiti coating. The anti-graffiti coating is repellent to the new color and makes the surface of the product very easy to clean.

Material marking in product code:
G- anti-graffiti coating

The use of the legend on the example of M5 with anti-graffiti coating: DGM5-G
