

JADA planter

The plant container Jada helps to create cozy green corners in the urban space. There are three different sizes to choose from, which allows you to approach the space flexibly and creatively.

The inside and frame of the plant container are made of hot-dip galvanized and powder-coated steel sheet, which makes the product extremely resistant to moisture and various weather conditions. The natural charm and softness is added by the high-quality knot-free wood boards on the outer sides.

With the Jada plant container, you can bring a piece of nature and warmth to even the coldest architecture.

FEATURES

The Jada plant container is a great addition to beautify the entrance of a building or a street corner.

Makes the surroundings unique and adds characteristics.

The container includes a raised bottom for plants with a shallow planting depth.

Holes in the bottom allow excess moisture to escape.

Hot-dip galvanized and powder-coated steel sheet and high-quality knot-free wood makes the product very resistant to weather and use.

EXTERY quality without compromise- harmonious design, carefully selected materials and engineering considered to the last detail.

WOOD

The wooden panels on the outer sides of the container are available in high-quality, knot-free tropical wood.

Tropical wood

METAL

The construction is made from hot-dip galvanized and powder coated sheet metal. The thickness of the zinc layer is 275 g/m², which meets the EN 10346:2006 standard.
