

TWIST bench

Design by
Margus Triibman

Twist's charm lies in its construction which at the first glimpse seems to be ordinary. This creates a clear and strong timeless solution.

Due to its miniature and compact form, Twist leaves an empty space around it, thus being suitable for demanding and rigid environments.

TWIST bench

FEATURES

A bench with a unique twist.

Strong and durable metal construction with the thickness of 10 mm is hot-dip galvanized which gives an ultimate protection against rust.

Narrow leg finish on the ground ensures quick and easy maintenance around the bench.

No visible fixing materials on the top surfaces of the wooden parts ensure a pleasing look and feel of the products.

The hot-dip galvanized steel frame and high-quality, knot-free wooden material makes the product very resistant to weather and use.

Extery quality without compromise- harmonious design, carefully selected materials and engineering considered to the last detail.

WOOD

The wood selection includes double layer oil coated knot-free thermo-treated ash and tropical wood. Tropical wood has no top coat.

Thermotreated ash (oiled)

Tropical wood

Hot-dip galvanized steel

METAL

The steel frame is available in hot-dip galvanized steel. The hot-dip galvanizing is done according to ISO 1461:2009 standard.

INSTALLATION

Anchored to a firm foundation.

Anchored to the substructure laid into the ground

Material marking in product code:
a- thermotreated ash
t- tropical wood

Example of the code use for tropical wood: TWI200-t

DIMENSIONS

Twist bench - TWI200
